## **Orbit Release Notes**

**Version 1.2.1**

### **What's New**

1. Support for copy and paste activation key from the clipboard to the key input fields.
2. Gain field in General Control Window will now show values with one decimal precision.
3. Reset Master volume slider to 0 dB by double clicking on Slider handle.

### **Issues Fixed**

1. Source gain value gets rounded off when entered in the gain field in the source properties panel.
